

Team Southeast:

As you all know, Networkfleet launched the new 4200 Non-Diagnostic Device this month. There has been a lot of excitement around this new product and now that it has launched, the sales orders are really rolling in. With that said, I want to take a minute to recognize the Reseller who is responsible for the very first 4200 unit ever sold. I am extremely excited that our District is getting recognition for this achievement. Ya'll continue to show strong every month and I really appreciate the effort.

Without further ado.....

Please join me in congratulating **Terri Sullivan** and her team at **Sullivan Communications** for placing the very first order for the new 4200 unit!!!!

Technically, they got the first 25 units ever sold.

Terri has been interviewed by our Public Relations Team and will have a quote featured on the official Press Release for the 4200 unit. She will also receive the Golden Sale Award from Networkfleet to recognize this historic accomplishment. This award will be shipped to Sullivan Communications next week so they can display it proudly for all to see.

Thank you, Terri and Team Sullivan Communications, for your hard work, dedication and awesome accomplishment!

Sean Stenson
District Manager - SE
